

EXHAUST FAN TRAY

P/N 7300014

This 19" rack mounted fan tray has been designed for COTS protection inside rack in applications where the integrator has to meet stringent temperature environments and/or uses sensitive electronic devices requiring high flow rate and generating high pressure drop. The fan tray has been designed to be mounted on rear EIA rails as an exhaust cooling system

Features

Physical

Dimensions: 705" H x 19" W x 2.3" D
Weight: 5 lbs

Mechanical

Rack mount: Aluminum (finger guards provided)

Electrical Features

Input: 115V / 60 Hz
Power main connector: NEMA standard 2 ft cord

Environmental Characteristics

This unit has been qualified inside 901D racks to MIL S 901D grade A barge test requirements (14 Hz deck)

901D Options

Low Noise for stringent airborne rack requirements

Deepd rack / high power 20" deep configurations
